Art Unit: 2126

RESTRICTION**1. Groupings**

- I. Claims 1-13 drawn to scheduling processes, classified in class 709, subclass 102.
- II. Claims 14-16 and 23-25 drawn to handling transfer commands, classified in class 709, subclass 310.
- III. Claims 17-22 drawn to computer message routing, classified in class 709, subclass 238.

2. Subcombination, Usable Together

Inventions I, II and III are related as subcombinations disclosed as usable together in a single invention. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as forwarding commands for interprocess communications, and invention III has utility for computer data routing. See MPEP § 806.05(d).

3. Conclusion

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art I) as shown by their different classification, 2) because of their recognized divergent subject matter, and/or 3) the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

4. Telephone Requirement

A telephone call was made to Mr. Dennis Fernandez (Applicant's representative) on 4 December 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.
